Bengaluru Lakes Snapshot, monsoon 2026

Every lake on the Greater Bengaluru custody lists, read from Sentinel-2 at Tier 1 (relative, uncalibrated), with an order of priority for restoration funding. Reading window: **monsoon (Jun-Sep) 2026** for 173 of 180 assessed lakes (each lake's own window is named in the list). Archive 28 March 2017 to 30 August 2026; observed passes only, nothing interpolated. A post-monsoon edition follows in November 2026 from the same pipeline.

Custody lakes on the KTCDA lists	Assessed at open resolution	Condition D or E	Fundable now
210	**180**	**85**	**46**
BBMP, BDA, Forest Department, BMRCL; one duplicate row removed	30 unassessed: no polygon at 10 m, or below the evidence floors	1,151 of 2,259 ha of assessed footprint	Fund now 28 and Co-fund 18; Design first 53

How to read a number in this report

Each value is a seasonal median of clear satellite passes, shown as **value ± band** with **n** passes and a confidence class **H / M / L**. The band is the reading's own uncertainty (sampling and classification for shares, spread across passes for indices). A Health Card band is assigned only where the band is wider than the error; otherwise both candidate bands are listed. Nothing below an evidence floor is shown as a value.

Why nothing reads High. A class is the weakest of six components, and two cannot reach High from a 10 m satellite and a mapped boundary: closeness to shore (only lakes over about 100 ha escape it) and boundary provenance (High needs a surveyed boundary). Medium is the ceiling for now; a surveyed boundary and a field calibration unlock High.

The monsoon window. Storage is read in the wettest months, so the share-of-extent band flatters no lake and the vegetation and chlorophyll readings are at their seasonal high; the November edition reads the same lakes after the rains.

What this snapshot cannot say

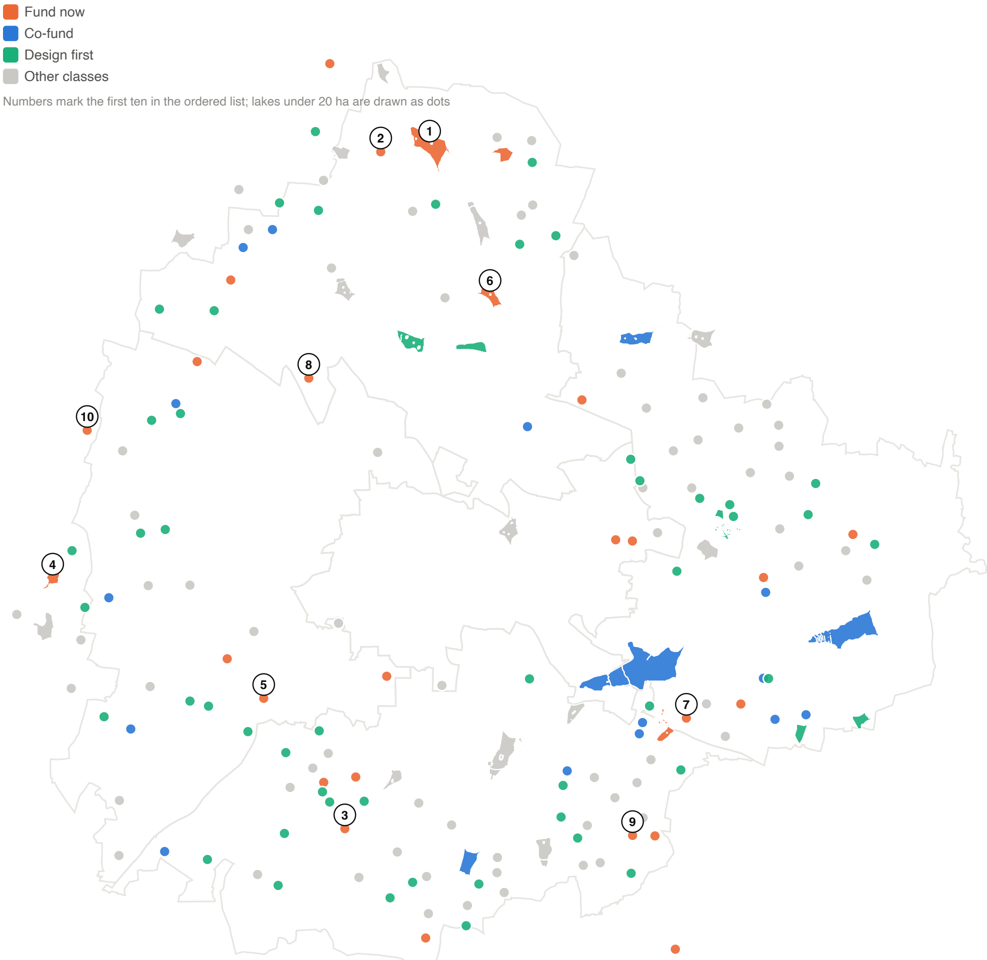
Dissolved oxygen, BOD, COD, nutrients, coliform, metals and toxins have no optical signature; the regulator's Use Based Class (KSPCB, June 2026) is shown beside the satellite reading for 101 lakes and is never recomputed. Chlorophyll and turbidity are relative indices until a field calibration exists; no calibrated concentration appears here. The vegetation share includes floating mats and emergent reeds inside the footprint. Encroachment is read at 10 m from Dynamic World and needs a survey sketch or a sub-metre scene before any claim. Boundaries are OpenStreetMap polygons united with the observed water extent, not survey boundaries.

The first ten in the order

1. **Yelahanka Amani kere** (BBMP, 98.6 ha (244 acres)): Fund now. Open water over 95% of the footprint; a strong chlorophyll signal on the open water (proxy 0.42, in the bloom range); the regulator's June 2026 class is E.
2. **Puttenahalli Lake** (Forest Department, 8.7 ha (21.6 acres)): Fund now. Vegetation covers 100% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is E.
3. **Doddakalasandra Lake** (BBMP, 5.8 ha (14.4 acres)): Fund now. Vegetation covers 99% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is D.
4. **Kannalli kere** (BBMP, 22.5 ha (56 acres)): Fund now. Vegetation covers 93% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is E.
5. **Hosakerahalli Lake** (BBMP, 15.0 ha (37 acres)): Fund now. Vegetation covers 91% of the footprint in the reading window, with open water at 2%; the regulator's June 2026 class is E.
6. **Rachenahalli Lake** (BBMP, 37.1 ha (92 acres)): Fund now. Open water over 85% of the footprint; a strong chlorophyll signal on the open water (proxy 0.44, in the bloom range); the regulator's June 2026 class is E.
7. **Saul Kere** (BBMP, 18.2 ha (45 acres)): Fund now. Vegetation covers 73% of the footprint in the reading window, with open water at 13%.
8. **J.P Park (Mathikere Lake)** (BBMP, 4.6 ha (11.5 acres)): Fund now. Vegetation covers 84% of the footprint in the reading window, with open water at 2%; froth on 25 clear passes since 2024; the regulator's June 2026 class is D.
9. **Parappana Agrahara** (BBMP, 4.6 ha (11.4 acres)): Fund now. Vegetation covers 100% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is D.
10. **Gangondanahalli Lake** (BBMP, 15.6 ha (39 acres)): Fund now. Vegetation covers 99% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is E.

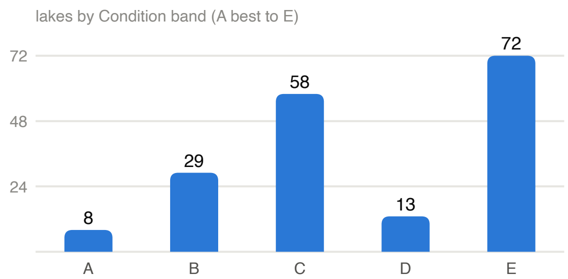
Order: Need class (Fund now, Co-fund, Intervene early, Design first, then the rest), Condition band, the published Need index, confidence, footprint area. Lakes are ordered within the city as the funding unit; custodians are not compared.

The city in one view

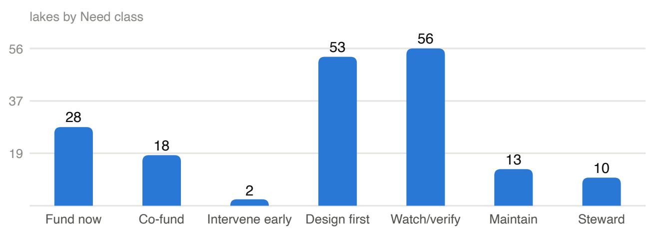


Beyond the frame: Bheemanakuppa Lake (Watch / verify)

Fixed footprints of the 180 assessed lakes on the five 2025 corporation outlines, coloured by Need class. Footprint = mapped boundary united with the observed water extent since 2017.



Condition band = the worse of the median and, where two or more inputs read E, the worst input; inputs are the share of the observed maximum held (C1), built share inside the footprint (C3), vegetated share (C4), the chlorophyll proxy (C5), froth events (C8) and the regulator's class (G2).



Need class by the register's rules (plan section 7.2): Condition D or E with a tractable boundary and no works on record reads Fund now (a budget line alone does not change it); with works on record, Co-fund; with a boundary or built-up question, or no water held in the window, Design first; a single severe input against an otherwise sound reading is a flag for a closer read (Watch / verify), not a verdict.

The regulator's view, June 2026: KSPCB classed 68 monitored lakes D (wildlife and fisheries) and 62 E (irrigation and industrial cooling), none A to C; 101 of those stations join a custody lake here.

Lakes with no open water observed in nine years: B. Channasandra, Chikka Begur Lake, Chikkakalasandra Lake, Mallasandra gudde Lake, Mylasandra (Sunnakallu palya) lake, Pattandur agrahara lake-124, Pattangere/Kenchenahalli lake, Sadaramangala Lake, Srinivasapura Lake, Vasanthapura Kere / Janardhana Kere. These read as dry, vegetated or built over at 10 m and are listed with Low boundary confidence.

The ordered list, fundable now first

Open water and vegetation cover (mats, reeds, scum) are shares of the footprint in the lake's reading window (percent ± points); the chlorophyll proxy is read on the open water (index units ± half the spread across passes; above 0.2 is the bloom range). n = clear passes with a value. H / M / L = confidence class. Rows shaded orange are Fund now and Co-fund. Condition A (best) to E (worst) is the worse of the median and the worst repeated input over storage, built share, vegetation, chlorophyll, froth and the regulator's class. The reason under each Need class names the inputs that drive it; every input per lake, with its band, is in the appendix at the end.

#	Lake	Need class and why	Condition	Open water	Vegetation cover	Chlorophyll proxy	KSPCB class	Programme on record	Conf.
1	**Yelahanka Amani kere** BBMP - North - 98.6 ha (244 acres)	Fund now chlorophyll proxy 0.42; regulator E; nothing on record	**E**	95 ±5 n18 M	4 ±5 n18 M	0.42 ±0.07 n18 M	E		M

1. Yelahanka Amani kere

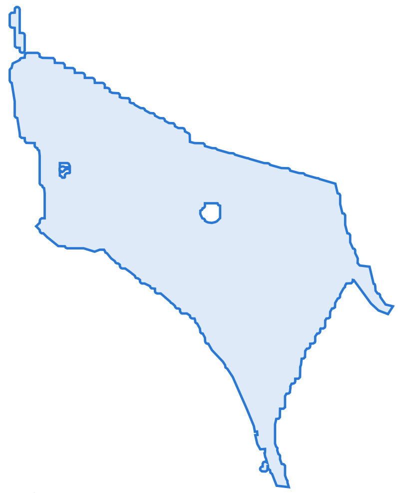
Custody list name: Yelahanka Amani kere (BBMP); North corporation, Aerocity ward; footprint 98.6 ha (244 acres); reading window pre-monsoon (Mar-May) 2026, 18 clear passes.

Fund now. chlorophyll proxy 0.42; regulator E; nothing on record.

What the satellite shows. Open water over 95% of the footprint; a strong chlorophyll signal on the open water (proxy 0.42, in the bloom range); the regulator's June 2026 class is E.

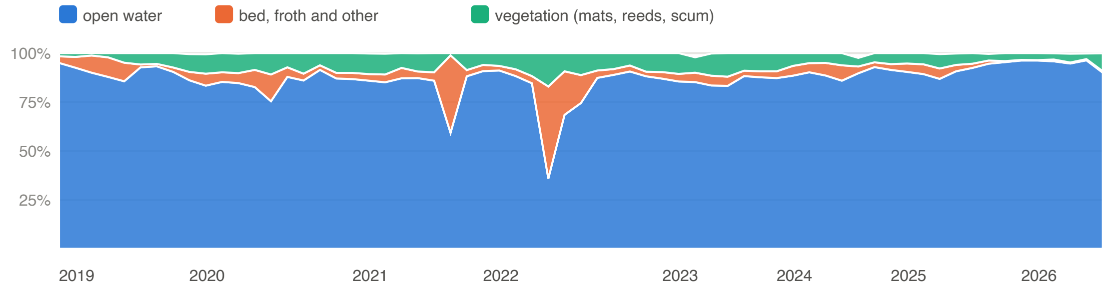
What the money buys: nutrient control at the inlets and in-lake aeration.

Open water (share of footprint)	95% ± 5 (n 18, M)
Vegetation cover (mats, reeds, scum)	4% ± 5 (n 18, M)
Exposed bed	1% ± 5 (n 18, M)
Chlorophyll proxy on open water	0.42 ± 0.07 (n 18, M)
Chlorophyll against its own history	98th percentile of its 2017-2025 pre-monsoon record (n 107)
Vegetation against its own history	25th percentile of its 2017-2025 pre-monsoon record (n 107)
Share of observed extent held	97% ± 6 (n 18, M)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	none recorded
KSPCB, June 2026	Class E; DO 2.8 mg/l, BOD 12 mg/l, turbidity 24 NTU
Programme on record	none
Cascade	position 5, 0 custody lakes downstream; 7,186 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

2. Puttenahalli Lake

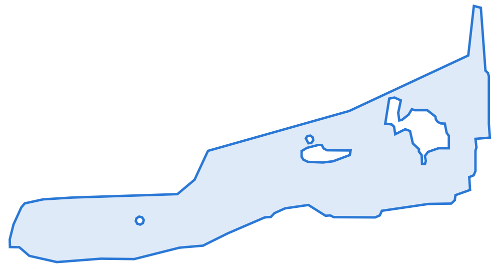
Custody list name: Puttenahalli Lake (Forest Department); North corporation, Doddabettahalli ward; footprint 8.7 ha (21.6 acres); reading window monsoon (Jun-Sep) 2026, 5 clear passes.

Fund now. vegetation 100%; holds 0% of its extent; regulator E; nothing on record.

What the satellite shows. Vegetation covers 100% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is E.

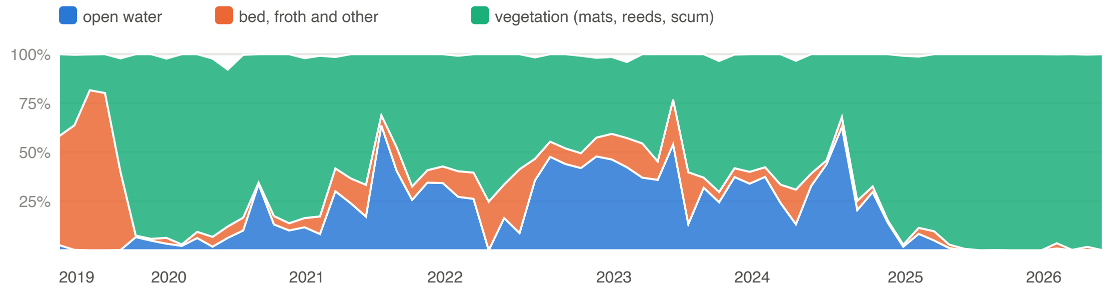
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	0% ± 5 (n 5, M)
Vegetation cover (mats, reeds, scum)	100% ± 5 (n 5, M)
Exposed bed	0% ± 5 (n 5, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	96th percentile of its 2019-2025 monsoon record (n 38)
Share of observed extent held	0% ± 9 (n 5, M)
Built share inside the footprint (2026)	0% (-38 points since 2019)
Froth passes per year (lower bound)	2023: 1
KSPCB, June 2026	Class E; DO 2.4 mg/l, BOD 8 mg/l, turbidity 12 NTU
Programme on record	none
Cascade	position 4, 1 custody lakes downstream; 5,562 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

3. Doddakalasandra Lake

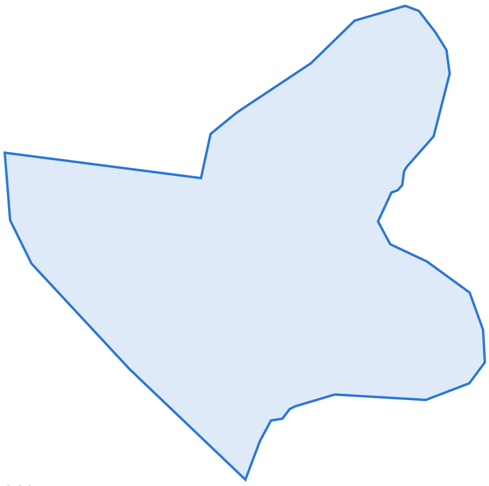
Custody list name: Doddakallasandra Lake (BBMP); South corporation, Anjanapura ward; footprint 5.8 ha (14.4 acres); reading window pre-monsoon (Mar-May) 2026, 18 clear passes.

Fund now. vegetation 99%; holds 0% of its extent; regulator D; nothing on record.

What the satellite shows. Vegetation covers 99% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is D.

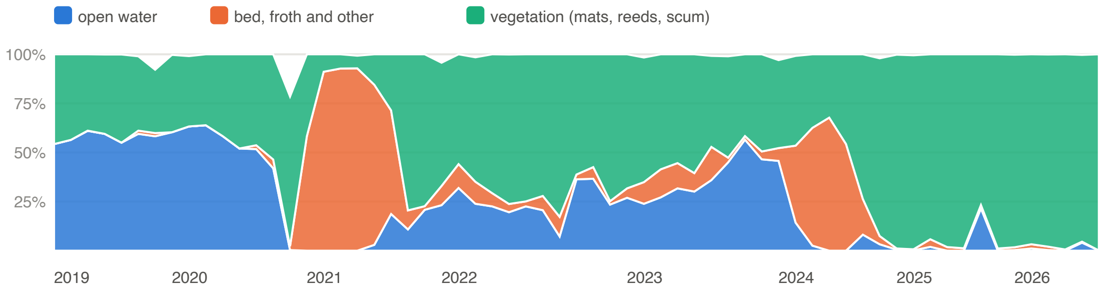
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	0% ± 5 (n 18, M)
Vegetation cover (mats, reeds, scum)	99% ± 6 (n 18, M)
Exposed bed	1% ± 6 (n 18, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	95th percentile of its 2017-2025 pre-monsoon record (n 104)
Share of observed extent held	0% ± 7 (n 18, M)
Built share inside the footprint (2026)	3% (+0 points since 2019)
Froth passes per year (lower bound)	2022: 1, 2023: 1, 2024: 1
KSPCB, June 2026	Class D; DO 4.8 mg/l, BOD 8 mg/l, turbidity 27.5 NTU
Programme on record	none
Cascade	position 2, 2 custody lakes downstream; 2,105 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

4. Kannalli kere

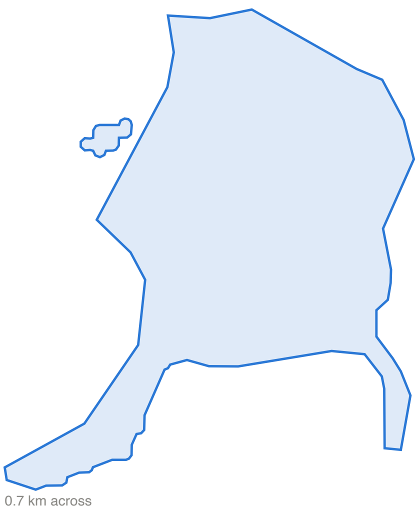
Custody list name: Kanna halli lake (BBMP); outside the 2025 ward layer corporation; footprint 22.5 ha (56 acres); reading window monsoon (Jun-Sep) 2026, 5 clear passes.

Fund now. vegetation 93%; holds 0% of its extent; regulator E; nothing on record.

What the satellite shows. Vegetation covers 93% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is E.

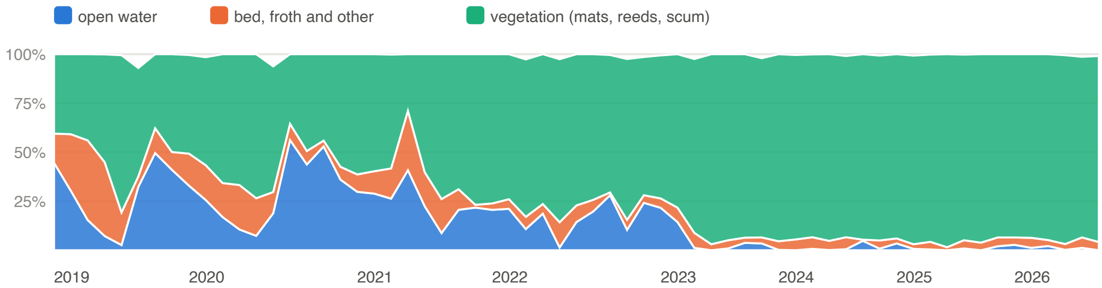
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	0% ± 5 (n 5, M)
Vegetation cover (mats, reeds, scum)	93% ± 6 (n 5, M)
Exposed bed	5% ± 6 (n 5, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	78th percentile of its 2019-2025 monsoon record (n 27)
Share of observed extent held	0% ± 9 (n 5, M)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	none recorded
KSPCB, June 2026	Class E; DO 0.5 mg/l, BOD 35 mg/l, turbidity 24.6 NTU
Programme on record	none
Cascade	position 3, 2 custody lakes downstream; 7,158 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

5. Hosakerahalli Lake

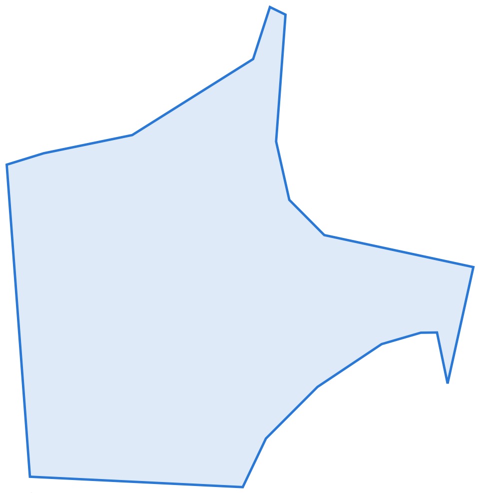
Custody list name: Hoskerehalli Lake (BBMP); West corporation, Bangarappa Nagara ward; footprint 15.0 ha (37 acres); reading window monsoon (Jun-Sep) 2026, 5 clear passes.

Fund now. vegetation 91%; holds 20% of its extent; regulator E; nothing on record.

What the satellite shows. Vegetation covers 91% of the footprint in the reading window, with open water at 2%; the regulator's June 2026 class is E.

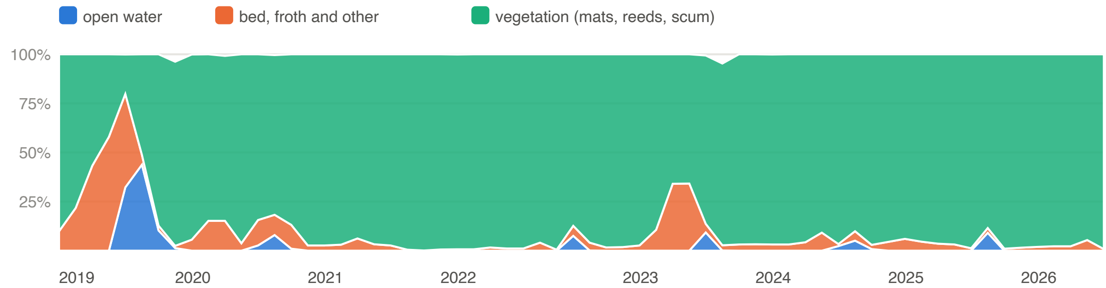
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	2% ± 6 (n 5, M)
Vegetation cover (mats, reeds, scum)	91% ± 7 (n 5, M)
Exposed bed	4% ± 6 (n 5, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	20th percentile of its 2019-2025 monsoon record (n 25)
Share of observed extent held	20% ± 62 (n 5, M)
Built share inside the footprint (2026)	3% (-6 points since 2019)
Froth passes per year (lower bound)	none recorded
KSPCB, June 2026	Class E; DO 1 mg/l, BOD 27 mg/l, turbidity 18.6 NTU
Programme on record	none
Cascade	position 2, 0 custody lakes downstream; 30,273 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

6. Rachenahalli Lake

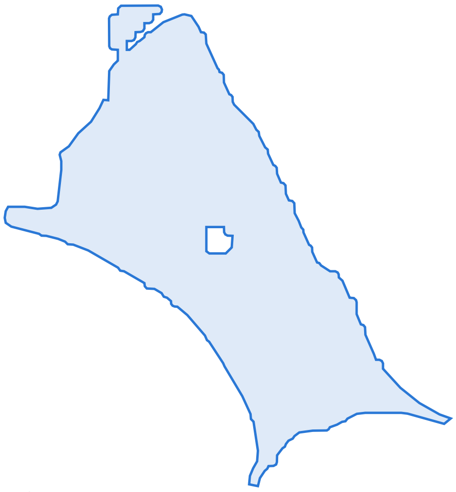
Custody list name: Rachenahalli Lake (BBMP); North corporation, Jakkur ward; footprint 37.1 ha (92 acres); reading window monsoon (Jun-Sep) 2026, 6 clear passes.

Fund now. chlorophyll proxy 0.44; regulator E; nothing on record.

What the satellite shows. Open water over 85% of the footprint; a strong chlorophyll signal on the open water (proxy 0.44, in the bloom range); the regulator's June 2026 class is E.

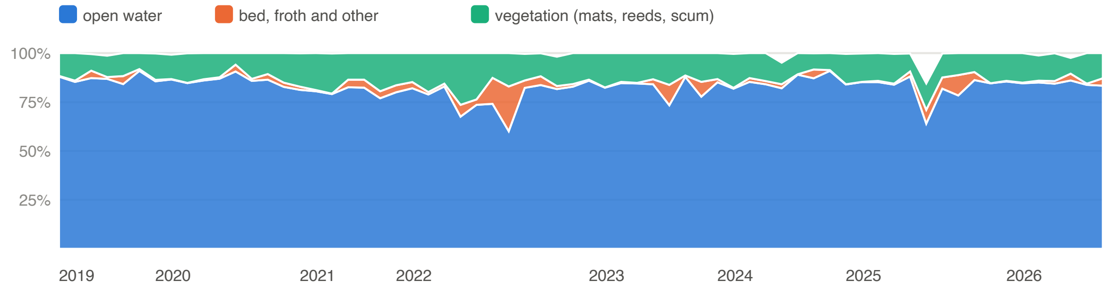
What the money buys: nutrient control at the inlets and in-lake aeration.

Open water (share of footprint)	85% ± 6 (n 6, M)
Vegetation cover (mats, reeds, scum)	14% ± 6 (n 6, M)
Exposed bed	1% ± 5 (n 6, M)
Chlorophyll proxy on open water	0.44 ± 0.11 (n 6, L)
Chlorophyll against its own history	75th percentile of its 2020-2025 monsoon record (n 32)
Vegetation against its own history	69th percentile of its 2020-2025 monsoon record (n 32)
Share of observed extent held	89% ± 6 (n 6, M)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	none recorded
KSPCB, June 2026	Class E; DO 2 mg/l, BOD 8 mg/l, turbidity 10 NTU
Programme on record	none
Cascade	position 5, 0 custody lakes downstream; 11,338 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

7. Saul Kere

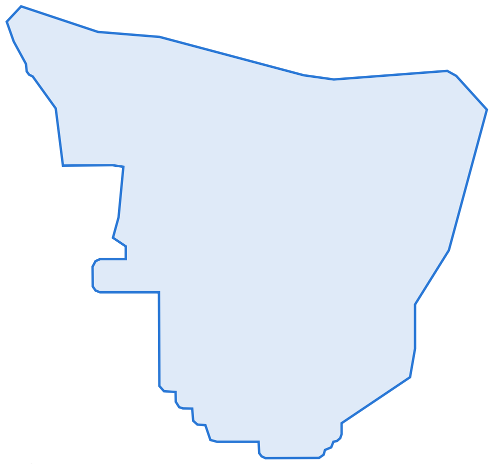
Custody list name: Sowl kere (BBMP); East corporation, Shivanasamudra Ward ward; footprint 18.2 ha (45 acres); reading window monsoon (Jun-Sep) 2026, 7 clear passes.

Fund now. vegetation 73%; holds 17% of its extent; nothing on record.

What the satellite shows. Vegetation covers 73% of the footprint in the reading window, with open water at 13%.

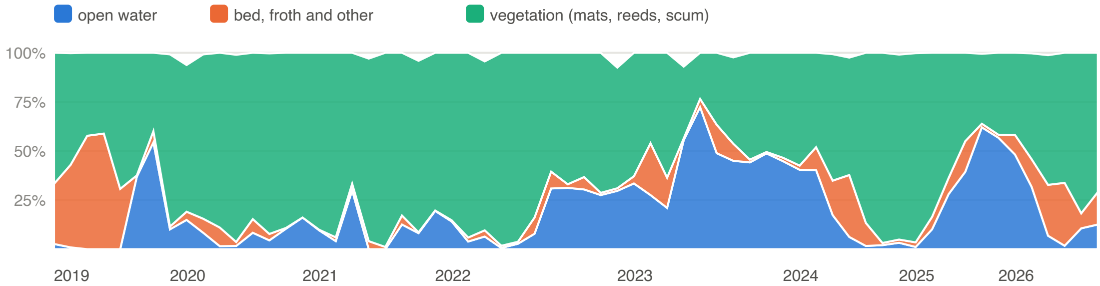
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	13% ± 7 (n 7, M)
Vegetation cover (mats, reeds, scum)	73% ± 7 (n 7, M)
Exposed bed	14% ± 7 (n 7, M)
Chlorophyll proxy on open water	0.20 ± 0.16 (n 7, L)
Chlorophyll against its own history	71th percentile of its 2019-2025 monsoon record (n 24)
Vegetation against its own history	48th percentile of its 2019-2025 monsoon record (n 27)
Share of observed extent held	17% ± 9 (n 7, M)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	2026: 1
KSPCB, June 2026	no station joined
Programme on record	none
Cascade	position 6, 1 custody lakes downstream; 5,863 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

8. J.P Park (Mathikere Lake)

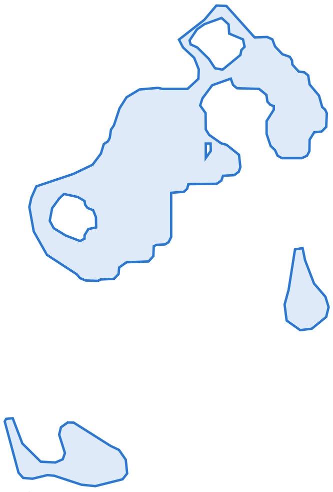
Custody list name: ,ward no 154 J.P Park / Bangalore North (BBMP); North corporation, J.P PARK ward; footprint 4.6 ha (11.5 acres); reading window monsoon (Jun-Sep) 2026, 6 clear passes.

Fund now. vegetation 84%; holds 2% of its extent; froth 8/yr; regulator D; nothing on record.

What the satellite shows. Vegetation covers 84% of the footprint in the reading window, with open water at 2%; froth on 25 clear passes since 2024; the regulator's June 2026 class is D.

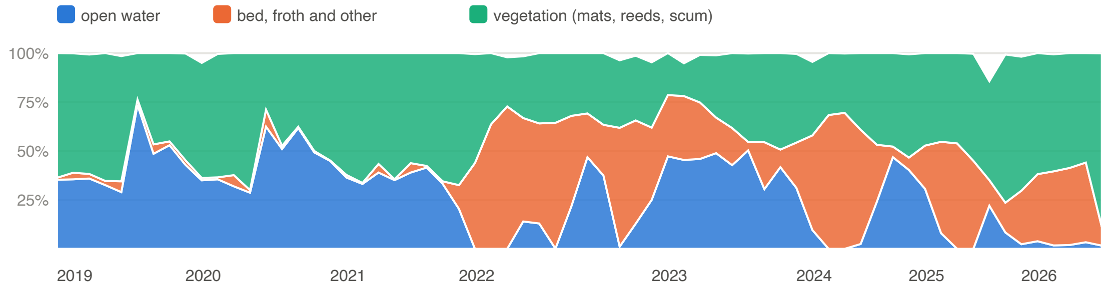
What the money buys: weed and mat removal with inflow control so it does not regrow; surfactant and sewage control upstream of the weir.

Open water (share of footprint)	2% ± 7 (n 6, L)
Vegetation cover (mats, reeds, scum)	84% ± 10 (n 6, M)
Exposed bed	14% ± 9 (n 6, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	100th percentile of its 2019-2025 monsoon record (n 33)
Share of observed extent held	2% ± 10 (n 6, L)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	2022: 21, 2023: 11, 2024: 11, 2025: 14
KSPCB, June 2026	Class D; DO 4.2 mg/l, BOD 5 mg/l, turbidity 10 NTU
Programme on record	none
Cascade	position 2, 0 custody lakes downstream; 9,374 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

9. Parappana Agrahara

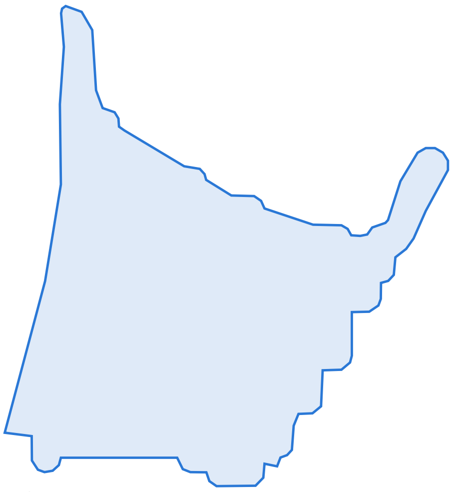
Custody list name: Parappana Agrahara / Bangalore (BBMP); South corporation, Naganathapura ward; footprint 4.6 ha (11.4 acres); reading window monsoon (Jun-Sep) 2026, 4 clear passes.

Fund now. vegetation 100%; holds 0% of its extent; regulator D; nothing on record.

What the satellite shows. Vegetation covers 100% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is D.

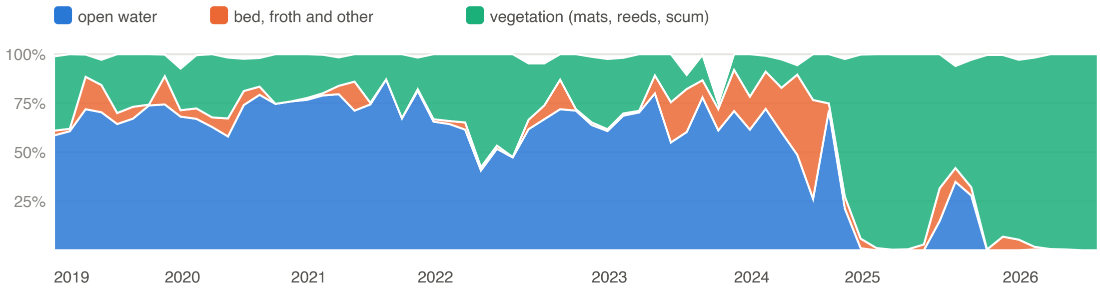
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	0% ± 5 (n 4, L)
Vegetation cover (mats, reeds, scum)	100% ± 5 (n 4, M)
Exposed bed	0% ± 5 (n 4, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	100th percentile of its 2020-2025 monsoon record (n 29)
Share of observed extent held	0% ± 6 (n 4, L)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	2023: 1, 2024: 1
KSPCB, June 2026	Class D; DO 5.2 mg/l, BOD 6 mg/l, turbidity 34.9 NTU
Programme on record	none
Cascade	position 1, 7 custody lakes downstream; 2,174 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date



Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

10. Gangondanahalli Lake

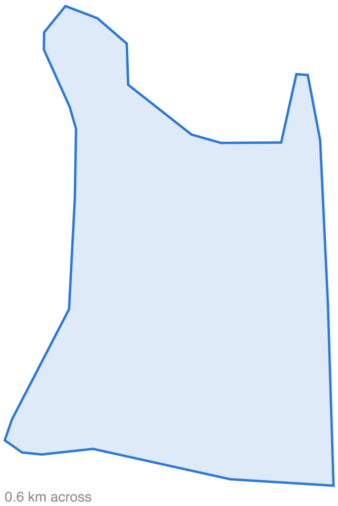
Custody list name: Gangondanahalli Lake (BBMP); outside the 2025 ward layer corporation; footprint 15.6 ha (39 acres); reading window monsoon (Jun-Sep) 2026, 5 clear passes.

Fund now. vegetation 99%; holds 0% of its extent; regulator E; nothing on record.

What the satellite shows. Vegetation covers 99% of the footprint in the reading window, with open water at 0%; the regulator's June 2026 class is E.

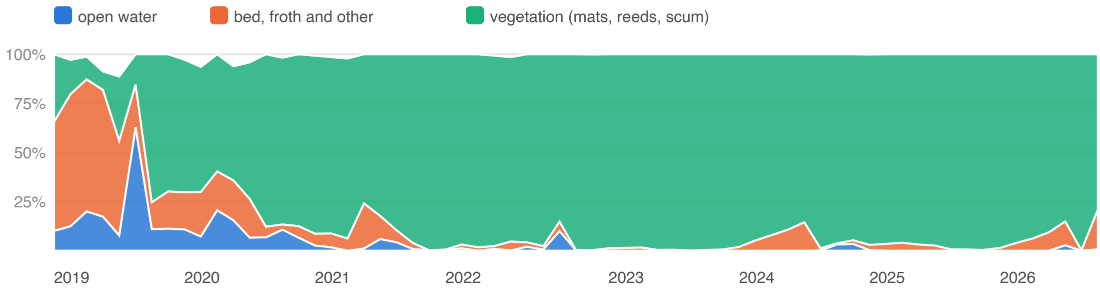
What the money buys: weed and mat removal with inflow control so it does not regrow.

Open water (share of footprint)	0% ± 5 (n 5, M)
Vegetation cover (mats, reeds, scum)	99% ± 6 (n 5, M)
Exposed bed	1% ± 6 (n 5, M)
Chlorophyll proxy on open water	insufficient
Chlorophyll against its own history	no baseline yet
Vegetation against its own history	66th percentile of its 2019-2025 monsoon record (n 29)
Share of observed extent held	0% ± 18 (n 5, M)
Built share inside the footprint (2026)	0% (+0 points since 2019)
Froth passes per year (lower bound)	none recorded
KSPCB, June 2026	Class E; DO 0.7 mg/l, BOD 90 mg/l, turbidity 5.7 NTU
Programme on record	none
Cascade	position 3, 0 custody lakes downstream; 4,392 buildings in the catchment
Boundary	osm+observed max, confidence medium



Fixed footprint: the mapped boundary united with the observed water extent since 2017. All condition inputs for this lake are in the appendix.

Surface composition, monthly medians 2019 to date

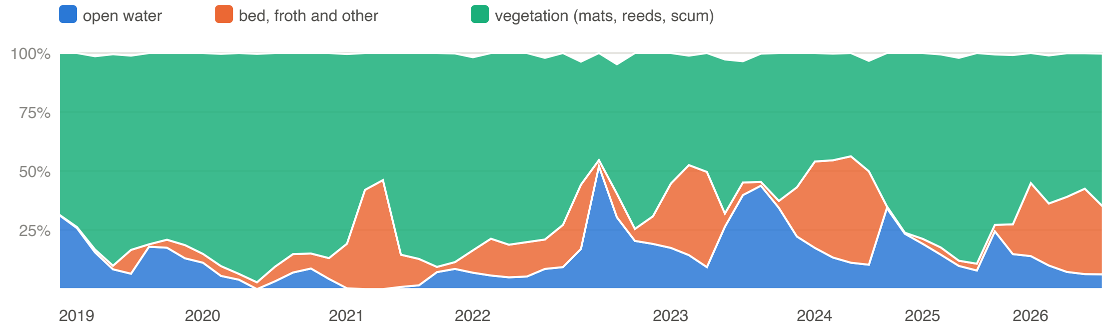


Open water, vegetation cover and the rest, per month; a month with fewer than two clear passes is a gap.

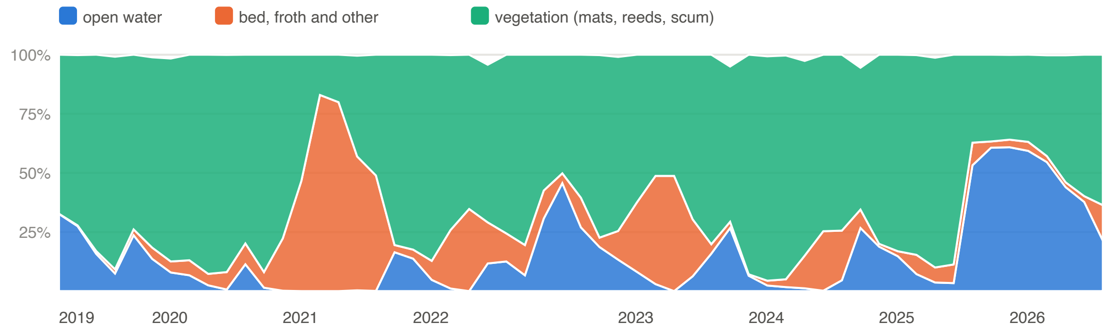
What continuous monitoring looks like

Three lakes with named sub-zones, monthly medians of the surface composition from 2019 (a month with fewer than two clear passes is a gap, not a value). The monsoon months are thin on every lake, which is what an honest optical record looks like.

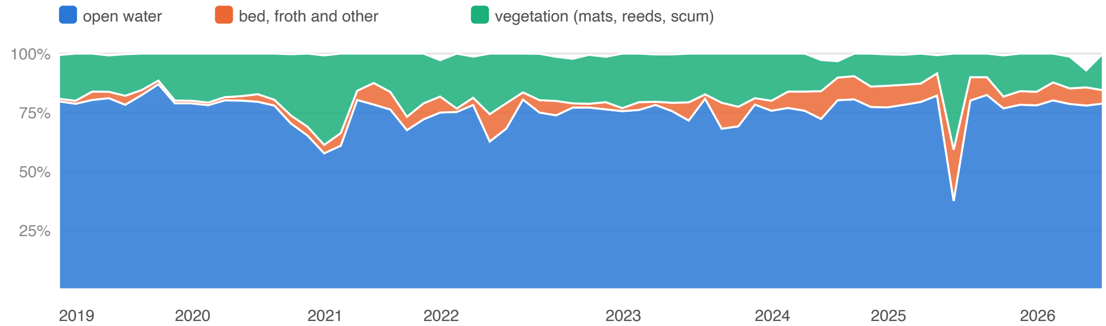
Bellandur (BDA)



Varthur (BDA)

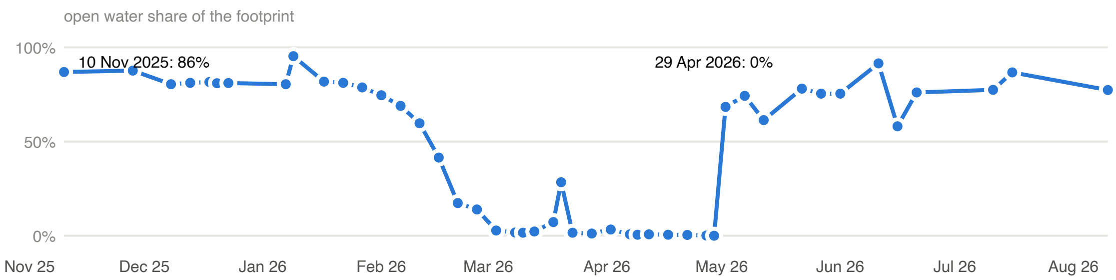


Jakkur (BBMP)



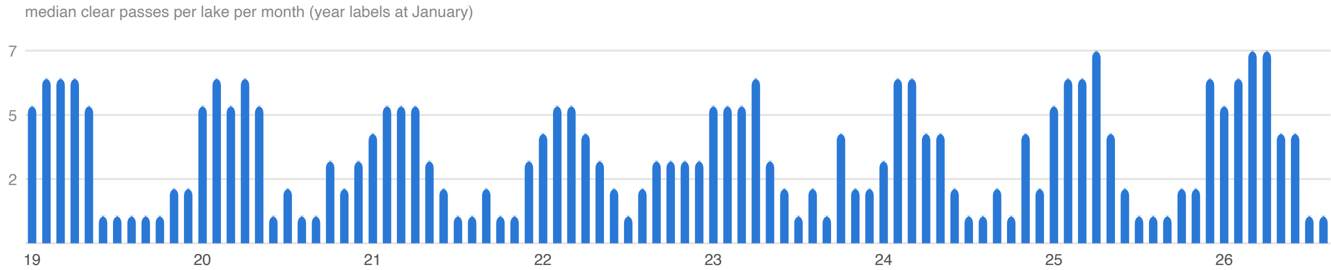
Surface classes per pass: open water, vegetation cover (floating mats, reeds along the margins, surface scum; a reed fringe is healthy, a hyacinth mat is not, and the split is a coming refinement), froth, and exposed bed. Sentinel-2, 10 m.

Ulsoor, November 2025 to August 2026

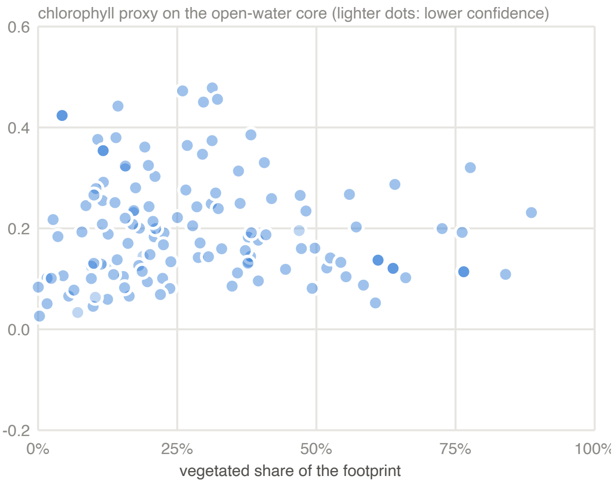


Open-water share of the footprint per clear pass. The lake was drained from February 2026 for its NDMF desilting works; the series will show the refill.

Coverage, 2019 to date



Median clear passes per lake per month. The monsoon gap is reported, never filled; the archive over Bengaluru is dense from 2019.



Assessed lakes with a computable chlorophyll proxy: vegetated share against the chlorophyll proxy on the open-water core, reading window medians. Two groups: mat-covered lakes and bloom-prone open lakes; both are eutrophication, with different measures.

Confidence

Assessed lakes by the weakest of their open-water, vegetation and chlorophyll readings: insufficient 19, low 142, medium 19.

A confidence class is the weakest of six components: pixels inside the lake after the shoreline ring, the share of the lake close to shore, clear passes in the window, the length of the lake's own record, validation of the surface classes on the lake's type, and the boundary's provenance. High needs every component High, which a 10 m sensor cannot give a lake under about 20 ha and a mapped boundary cannot give any lake; Medium is the ceiling for the large lakes until a surveyed boundary and field calibration exist. The monsoon window also thins the clear passes; the post-monsoon edition will lift the pass component for most lakes.

Method, in brief

Universe. The Karnataka Tank Conservation and Development Authority custody lists for Bengaluru (BBMP, BDA, Forest Department, BMRCL): 210 lakes, each joined to a mapped boundary, the BBMP Lake Management System point, the 2025 ward and corporation, the platform's cascade layer, the regulator's June 2026 station, and the programme rows on record.

Sensor. Copernicus Sentinel-2 (10 m, a pass every two to three days over Bengaluru), every scene from March 2017 to the reading date, cloud-masked pixel by pixel; observed passes only, nothing interpolated.

Per lake, per pass. A fixed footprint (the mapped boundary united with the observed water extent); the share of the footprint reading as open water, vegetation (mats and emergent growth), froth and exposed bed; and on the open water, relative indices for chlorophyll, turbidity, coloured organic matter and apparent colour. These are Tier 1 (relative) readings: comparable across lakes and years, not concentrations.

Per lake, per window. Seasonal medians with their spread, percentile against the lake's own same-season history, water area and share of the observed maximum, froth events per year, built share inside the footprint, and the confidence class. Health Card bands are assigned only where the band is wider than the error.

Need class and order. The register's published rules over four axes (Condition, Stakes, Tractability, Urgency) with the programme on record; lakes are ordered within the city as the funding unit. The full method, error model and rule set are in the Neer Vazhvu methodology note, available on request.

Unassessed at open resolution (30)

Listed after the ordered list with the queue reason, per the register rule. A hand-digitised boundary or a sub-metre scene moves a lake into the assessed set.

Lake	Queue reason
Siddapura Lake BBMP -	no polygon at open resolution; LMS point on record
Gangashetty Lake BBMP -	no polygon at open resolution; LMS point on record; KSPCB station 'Gangashetty Lake' at 13.00502, 77.693716 (Class E, June 2026)
Puttenahalli / Byraweshwara BBMP -	no polygon at open resolution; LMS point on record
Lingadeeranahalli (handrahalli) North Lake Bangalore North BBMP -	no polygon at open resolution; LMS point on record
Chikkabasthi lake BBMP -	no polygon at open resolution; LMS point on record
Gandhinagar Hosakerehalli BBMP -	no polygon at open resolution; LMS point on record
Varahasandra Lake BBMP -	no polygon at open resolution; LMS point on record
Gattigerepalya (Sompura) lake BBMP -	no polygon at open resolution; LMS point on record

Thavarekare BBMP -	no polygon at open resolution; no location on record
Karisandra lake BBMP -	no polygon at open resolution; no location on record
Nandi shettappa lake BBMP -	no polygon at open resolution; no location on record
Arehalli 2 & 3 (Small tanks) (Disused lake) BBMP -	no polygon at open resolution; no location on record
Bovimaranahalli BBMP -	no polygon at open resolution; no location on record
Gundopanth lake BBMP -	no polygon at open resolution; no location on record
Kamakshipalya Lake BBMP -	no polygon at open resolution; no location on record
Sanegoravanahalli Lake BBMP -	no polygon at open resolution; no location on record
Agraharadasarahalli Lake BBMP -	no polygon at open resolution; no location on record

Appendix: condition inputs per lake

C1 share of observed extent held, C3 built share, C4 vegetation cover, C5 chlorophyll proxy, C8 froth events per year, G2 the regulator's class; a band followed by candidates in brackets, such as D(C/D), means the error band straddles a boundary and the value's band is shown with both candidates.

#	Lake	Condition	Inputs	Notes
